Two lighters are displayed against a dark grey background. The lighter on the left has a brushed brass body, a purple leather band around the top, and a brass ring. The lighter on the right has a black body, a rose gold band around the top, and a black ring. Both lighters are open, showing their internal mechanisms. The text "Qqubn" is visible on the purple leather band of the brass lighter and on the rose gold band of the black lighter. A white curved line is in the top right corner, and a red curved line is in the bottom left corner.

grace and
elegance

Quba is luxury hardware brand by the QUBA Group that embodies passion, individuality and authenticity. With a and inspires while staying sustainable in function and form.

Since it's inception in 2010, the brand has brought together and reined designs, exquisite craftsmanship and cutting edge technology to create pieces of art disguised as hardware. CYLINDERS SIZE CALCULATION

Over all Cylinder Length,

$$L = D + (2 * B)$$

CAUTION:

Always check the mortise lock is fitted in the middle of the door, if not an offset cylinder is required. For security reasons, it's best where possible to have the Euro cylinder finish flush (flat) with the edge of the back plates fitted to the doors. Cylinders that stick out past back plates are much more vulnerable to attacks as they can more easily be hammered, twisted or cut during an attack.

DOOR WEIGHT CALCULATION

Height (m) x Width (m) x Thickness (mm) x D (g/cc)

D = Density

Wood, D = 0.75 g/cc

Glass, D = 2.5 g/cc

DOOR CLOSERS (SIZING):

Door closers are sized from 1 to 7 with the higher numbers used for more powerful units.

Manufacturers have selection guides based on the width and weight of the door but there are adjustable units if an accurate door sizing is unavailable.

The following chart shows the test door mass / size for the seven identified grades under the BS EN 1154 classification (a recognized standard for classifying door closers).

Closer Size	Door Width	Max. Door Weight
EN 1	750 mm	20 k g
EN 2	850 mm	40 k g
EN 3	950 mm	60 k g
EN 4	1100 mm	80 k g
EN 5	1250 mm	100 k g
EN 6	1400 mm	120 kg
EN 7	1600 mm	160 kg

CAUTION:

Always round up to the next door width (i.e., for 870 mm door use 950 mm).

If more severe conditions are expected then use the next door width (i.e., for 830 mm door use 950 mm).

When specifying pelmet arm functions, allowance should be made for approx. 30% loss respectively.
